

HCL Placement Previous Papers

Written Test Syllabus & Section-wise Pattern

Section	Difficulty	Questions	Time
Quantitative Ability	Moderate	15 Questions	15 Minutes
Verbal English	Moderate	15 Questions	15 Minutes
Logical Reasoning	Moderate	15 Questions	15 Minutes
Technical Section	Toughest	30 Questions	30 Minutes
Coding	Moderate to Difficult	2 Questions	20 Minutes

1. Quantitative Ability

Difficulty: Moderate

This is the first section of the written test.

Topics Covered:

- HCF and LCM
- Number System
- Time and Work, Pipes and Cisterns
- Permutation and Combination
- Geometry
- Time Speed and Distance
- Probability
- Profit and Loss
- Interest, Mixtures, and Allegations
- Logarithms

Number of Questions	15 Questions
Total Time Limit	15 Minutes

2. Verbal English

Difficulty: Moderate

The Verbal Ability section covers the following topics.

Topics Covered:

- Sentence Correction
- Reading Comprehension
- Grammar
- Synonyms and Antonyms
- Fill in the Blanks
- Spellings

Number of Questions	15 Questions
Total Time Limit	15 Minutes

3. Logical Reasoning

Difficulty: Moderate

This section is one of the trickiest sections of the placement process.

Topics Covered:

- Directional Sense
- Logical Reasoning
- Coding and Decoding
- Data Sufficiency
- Pattern Analogy
- Number Series
- Logical Statement Assumptions

Number of Questions	15 Questions
Total Time Limit	15 Minutes

4. Technical Section — Computer Fundamentals

Difficulty: Toughest

Computer Fundamentals is described as the toughest section of the HCL Placement Papers.

Topics Covered:

- Computer Basics
- Data Structures
- OOPS
- Code Input Outputs
- Networking
- Operating Systems (OS)
- DBMS

Number of Questions	30 Questions
Total Time Limit	30 Minutes

5. Coding

Difficulty: Moderate to Difficult

This is the last section of the written test. The key preparation topics are:

Topics Covered:

- ■ Arrays and Strings
- ■ Hashing and Maps
- ■ Sorting and Searching
- ■ Two Pointers
- ■ Sliding Window
- ■ Basic Recursion

Number of Questions	2 Questions
Total Time Limit	20 Minutes

Quick Test Strategy

- Quantitative Ability: Aim for about 1 minute per question and prioritize direct, calculation-friendly questions.
- Verbal English: Move quickly through grammar, vocabulary, spelling, and sentence correction; reserve time for Reading Comprehension.
- Logical Reasoning: Use diagrams or tables for directional, coding, series, and statement-based questions when useful.
- Technical Section: Revise core Computer Science concepts—DSA, OOPS, OS, DBMS, networking, and code output questions.
- Coding: Focus especially on Arrays & Strings, Hashing & Maps, Sorting & Searching, Two Pointers, Sliding Window, and Basic Recursion. Practice writing clean solutions under time pressure.

Total across the listed sections: 77 questions and 95 minutes.
